## Project Title:

# *Shop Finder*

## Project Overview:

This app is about helping the Users to find shops around places they want to visit (shopping mall, Historical Place and Markets). If they are intending to visit and exploring the various places this application will assist them about a particular place and shops around it. This application also facilitates the user to find local vendors quite easily.

The vendors can register their shops and provide details of shop at a particular place. There will be admins that manages information about visiting places. They can add or remove the place. Admin make a check and balance of vendors and their shops, so user cannot get a false information.
